Class 25—Roots and Vegetables

Sec 1, Beets, bunch of six—1st R. A. Cornell, 2nd D. G. Moyer.

Sec 2, Carrots, bunch of six, (short)—1st Ed. Bray, 2nd Mrs. J. Ozant.

Sec 3, Turnips, bunch of six (early)—1st R. A. Cornell, 2nd Mrs. G. Balaam.

Sec 4, Turnips, bunch of six (late)—1st D. G. Moyer.

Sec 5, Potatoes, one half bushel—1st D. G. Moyer.

Sec 6, Cabbage, 2 heads—1st R. A. Cornell, 2nd D. G. Moyer.

Sec 7, Cauliflower 2 heads—D. G. Moyer, 2nd Mrs. D. McQuarrie.

Sec 8, Cucumbers, bunch of three—1st D. G. Moyer.

Sec 9, Onions, any class—1st Mrs. Gus Schmitt, 2nd R. A. Cornell.

Sec 10, Onions, dutch sets—1st Mrs. E. Bray, 2nd Mrs. D. McQuarrie.

Sec 11, Parsley, two bunches—1st Mrs. E. Bray, 2nd D. G. Moyer.

Sec 12, Parsnips, bunch of six—1st Mrs. C. Godfrey, 2nd D. G. Moyer.

Sec 13, Rhubarb—1st Mrs. C. Godfrey, 2nd Mrs. N. Leitch.

Sec 15, Tomatoes, plate of six—1st D. G. Moyer, 2nd Mrs. D. McQuarrie.

Sec 16, Citrons, 3 fruits—1st Mrs. C. Godfrey, 2nd Mrs. D. McQuarrie.

Sec 19, Broad beans, 1 quart—1st Mrs. D. McQuarrie, 2nd Mrs. C. Godfrey.

Sec 20, Peas, (pod)—1st R. A. Cornell, 2nd Mrs. D. McQuarrie.

Sec 21, Corn, (green)—1st D. G. Moyer.

Sec 24, Mangels, 6 roots—1st Mrs. D. McQuarrie, 2nd D. G. Moyer.

Sec 25, Sugar beets, 6 roots—1st D. G. Moyer, 2nd Mrs. E. Bray.

Sec 28, Radish, any variety—1st D. G. Moyer, 2nd Mrs. D. McQuarrie.

Sec 29, Lettuce, 3 heads—1st R. A. Cornell, 2nd Mrs. D. McQuarrie.

Sec 30, Green beans, (pod)—1st D. G. Moyer, 2nd Mrs. D. McQuarrie.

Sec 31, Vegetable marrow—1st Mrs. D. McQuarrie, 2nd D. G. Moyer.

Sec 32, Best Collection of Vegetables—1st Mrs. C. Godfrey, 2nd Mrs. D. McQuarrie.

Class 27—Dairy Produce
Sec 1, Butter, fancy shapes table use—1st Mrs. H. J. Ball.

(Continued on page 2.)

Departmental Examination Results

Grade VIII candidates are required to make an average of 50 per cent. Pupils making less than 34 per cent on any subject fail, but low marks in one subject may be balanced by high marks in another, provided the average does not fall below the 50 per cent standard, nor below 34 per cent in the individual units.

The above statement applies to Grade VIII only.

Grades IX, X and XI, are examined on each unit of work, the standard being 50 per cent in each subject, without regard to averages. The Normal course consists of 21 units, of which 6 are usually studied in Grade IX, 7 in Grade X, and 8 in Grade XI. Students may, however, spread this work, together with 2 to 4 units in languages, over 4 years, thus having Junior Matriculation, as well as Normal School Entrance standing.

GRADE VIII
6 pupils wrote. 4 passed; 2 failed to make the required average. Those passing were:

Beatrice Barbour, Jessie Eskine, Rita Hatch and Alberta Wenger.

These pupils will receive Grade VIII diplomas later in the year.

GRADE IX	Units Written	Units Passed
Blanch Crowley	3	3
Edmund Todd	6	6
Marjorie May	6	5
Frank Morrell	6	5
Dick Desmond	6	1
Total	27	20

Experiment in Rust Prevention

Experiments in rust prevention by means of spraying chemical over wheat fields from airplanes is about to be tried out in Manitoba, under the direction of the Dominion Government Department of Agriculture. The chemical used is merely sulphur in a colloidal state, technically known as "Gala." It is said that one plane can treat 6,000 acres a day, flying at a height of 50 feet. The machine will carry 700 lbs. of chemical in the mechanical spraying apparatus.

BELIEVE THAT NAVAL ACCORD MAY YET COME

General—War between Great Britain, the United States and Japan is unthinkable, declares the Hon. C. G. Bragg, chief representative of the United States, at the closing session of the tripartite naval conference. Hence there is no reason, he added, why an agreement, which has not been obtained at Geneva, should not be reached shortly as the result of direct negotiations between the governments for a reconciliation of the divergent views.

The burial ceremony of a conference, held in the presence of a large assembly, was carried out without the employment of words of recrimination and as Right Hon. W. C. Braggman, head of the British delegation, said:

"We are not dispensing in a spirit of bitterness or despair."

When the conference adjourned this afternoon after the adoption of a joint declaration suggesting direct negotiations between the Governments, Mr. Braggman walked up the stairs of the Hotel de Bourgogne, in which was held the last act of the naval drama, to the private office of Mr. Gibson and shook his colleague warmly by the hand. This was taken as an indication that the First Lord of the British Admiralty believed the differences between the United States and Great Britain, at the conference, were nothing more serious than a slight family feud.

Admiral Sabin, chief of the American delegation, joined the British delegation, joined in the thought of Mr. Gibson and Mr. Braggman, declared in a victory address that he for one did not cling to the results of the conference as a rupture of negotiations was confined, he affirmed vigorously, that in some form or another, attempts to limit extravagance and competition in naval building, already initiated in practice by both nations, will continue and eventually succeed.

The joint declaration, adoption of which involved automatic agreement of the conference, represents an effort to summarize the viewpoints of the three delegations on the matters on which they agreed, and on those on which they disagreed. The declaration, which was signed by the three nations, was signed on two points.

First, that of tonnage, in which the British and the Americans were unable to reach an accord.

Second, on the problem of so-called eight inch gun cruisers.

Official Visit Will

Terminate At Calgary

Remainder Of Canadian Trip Is Holiday For Prince

OTTAWA.—By Prince of Wales plans extend five days of the Prince's tour of the Rockies and then to visit Vancouver and Victoria before returning home. It is probable that he will sail for England from Quebec on Sept. 7.

When the Royal train reaches Calgary and the two-day Prince's party company from Premier Baldwin, the official visit of the Prince in effect terminates. The remainder of his stay in Canada is primarily a holiday, although His Royal Highness expects to fill a few engagements.

Re-Visit Northern Post

OTTAWA.—The successful re-visit of Canada's farthest north police post, customs house and post office at Barne Peninsula on the west coast of Ellesmere Island by the Steamship Doublet is reported in a wireless message received at the North West Territories and Yukon branch of the Department of the Interior. This post is about 55 nautical miles south of the North Pole.

Aviators Reach Agreement

Paris.—Charles A. Levine, owner of the transatlantic plane Columbia, the newspapers stated today, has accepted the terms of the provisional agreement under which Maurice Drouhin, the French flyer, will pilot the plane back to New York.

Will Not Attend

It is stated on good authority that Lord Kipling, famous English poet, will not attend the semi-centennial celebration of the faculty of applied sciences and engineering to be held in Toronto on October 6, 7 and 8.

Financial Aid For Queen Marie

Paris.—A Havana despatch from the chamber of Deputies has stated that the government will give more money to Dowager Queen Marie from the state treasury than to little King Michael.

Poultry Congress Closes

Retiring President Receives Honorary Degree From McGill University

OTTAWA.—With speeches expressing international goodwill and with a touching tribute to the retiring president, Edward Brown, of England, the World's Poultry Congress concluded its business sessions.

Interesting announcements which featured the closing were: Edward Brown, F.R.S., of London, England, president and founder of the World Poultry Congress, will have an honorary degree conferred on him by McGill University, Montreal, at a special convocation.

These Excellencies Vincent and Lady Willingdon will shortly hold up a flock of poultry of a breed which Her Excellency particularly favours, as an outcome of the congress.

Ottawa Centenary club may be taken to England in 1926, en bloc, to take part in the fourth world's poultry congress to be held in London. United States poultry men are discussing chartering four ocean liners to carry them and their exhibits to the west world's poultry congress in London.

President Brown read messages from the kings of Europe and other distinguished personages, congratulating the congress upon its outstanding success at Ottawa.

Increase In Tourist Traffic

Canadian Rockies Great Drawing Card Says Railway Official

Winnipeg.—That tourist traffic this season has increased in previous years, and that visitors were coming to Canada from all parts of the world, was the opinion of the Canadian Pacific passenger traffic manager of the Canadian Pacific Railway.

Mr. Fisher, who has just completed a tour of inspection of the company's famous summer resorts at Banff and Lake Louise, said that more people than ever before are flocking to the resorts, and that indications pointed to a steadily increasing traffic year to year.

Mr. Fisher was optimistic with regard to conditions throughout the country and was of the opinion that business on the Pacific coast and the prairies was such as to give cause for general satisfaction.

Baldwin Celebrates

Sixtieth Birthday

King and Queen Send Greetings To British Premier

OTTAWA.—By the right Hon. Stanley Baldwin's 60th birthday and hundreds of congratulatory messages poured into Rideau Hall all day. Among them were messages from the King and Queen, expressing to the premier of Great Britain their congratulations on his 60th birthday.

He was presented with a silver salver by members of his staff, tokens of esteem from the Prince of Wales and Prince George and their Excellencies, Lord and Lady Willingdon, and a beautiful diamond and emerald cigarette pipe from Rt. Hon. Mackenzie King.

Mr. Geddes was one of 'Calgary's' best known business men. He was editor and vice-president of the Farm and Ranch Review, and was president of United Oil, Limited.

Heid Night Session

Dublin.—The Dail Eireann decided by a vote of 54 to 24 to sit all night for the purpose of passing the government's drastic public safety bill. The bill was introduced by President William Cosgrave, after the recent assassination of Vice-President Kevin O'Higgins. Under the bill the penalty may be imposed for the possession of arms.

Report Is Passed

OTTAWA.—A report which has appeared in a portion of the press to the effect that Right Hon. Stanley Baldwin has accepted a gift of a motor car made especially for his use during his Canadian visit was emphatically denied by members of the British Premier's staff. There was said to be absolutely no foundation for the report.

Promotions Approved

Regina.—Among the promotions and transfers approved by the Civil Service Commission are the following: Arthur Patterson, Prince Albert, from grade 3 clerk to grade 4; George Garrett, Forest Assessor, grade 2; John C. Coulter, Walter Patten, to be radio inspector or radio electrician, Regina.

Rockefeller Asked To Cancel Soviet Deals

British Group Want Oil Investment Withdrawn, It Is Reported

New York.—The New York Herald Tribune says that an appeal to John D. Rockefeller, Jr., active holder of the far flung Standard Oil empire, to withdraw from any financial deals with the Soviet Government has been made by Sir Keith Mclellan, managing director of the Royal Dutch Shell Oil group, of Great Britain. The appeal was made after the Royal Dutch group had been unable to block two large United States oil companies, members of the Standard Oil group, from entering into oil contracts with the Soviet.

In his letter Sir Keith is understood to have appealed to Mr. Rockefeller's interest in churches and philanthropic work, pointing out that the Soviet had destroyed churches and similar institutions as well as having confiscated property and nationalized all industry.

Heid Justified In Killing

Boston, Oct.—Alex. Hodges was justified in killing Dan Forsythe when the latter invaded his home near July 22, the coroner's jury inquiring into the case decided. The jury found that the jury even in its acquiescence to the death of an unknown man had arrived at the conclusion that the slain man was none other than Dan Forsythe and that he came to his death at the hands of Alex. Hodges, who acted in defense of his own life, and we deem him justified."

A Distinguished Visitor

OTTAWA.—The Hon. J. H. Macdonald, a distinguished visitor, was in town in a short time. Lord Howat of Hurry, chief justice of England, will attend the annual meeting of the Canadian Bar Association in Toronto, which will open on August 24. Lord Howat has held the present office since 1922, when he stepped in from the attorney-general from 1919.

MALCOLM GEDDES LOSES HIS LIFE ON LEFROY GLACIER

Calgary.—Malcolm D. Geddes, of Calgary, veteran member of the Alpine Club of Canada, was pitched 2,000 feet to his death when he attempted to glide down the Lefroy glacier, near Lake Louise, into a deceptive glacier and once Mr. Geddes started he found it was impossible to check his flight. First he was thrown, then his feet were torn from his hands and with terrific force he was carried over the edge and hurled to the rocks and ice far below.

Mr. Geddes was conducting a private party and a guide had not been taken along. He led his friends to Mount Lefroy peak, a feat that was difficult for him in the light of his experience in climbing this particular mountain, as "it was on the downward journey that the tragedy occurred. The expedition had been connected with the Alpine Club of Canada."

Mr. Geddes was one of 'Calgary's' best known business men. He was editor and vice-president of the Farm and Ranch Review, and was president of United Oil, Limited.

Heid Night Session

Dublin.—The Dail Eireann decided by a vote of 54 to 24 to sit all night for the purpose of passing the government's drastic public safety bill. The bill was introduced by President William Cosgrave, after the recent assassination of Vice-President Kevin O'Higgins. Under the bill the penalty may be imposed for the possession of arms.

Report Is Passed

OTTAWA.—A report which has appeared in a portion of the press to the effect that Right Hon. Stanley Baldwin has accepted a gift of a motor car made especially for his use during his Canadian visit was emphatically denied by members of the British Premier's staff. There was said to be absolutely no foundation for the report.

Promotions Approved

Regina.—Among the promotions and transfers approved by the Civil Service Commission are the following: Arthur Patterson, Prince Albert, from grade 3 clerk to grade 4; George Garrett, Forest Assessor, grade 2; John C. Coulter, Walter Patten, to be radio inspector or radio electrician, Regina.

CROP CONDITIONS ARE FAVORABLE IN ALL DISTRICTS

Ottawa.—Canada's crops are in good condition. A report issued by the Dominion Bureau of Statistics based on telegrams giving the condition of crops at the end of July shows that the crop situation in every province is favorable.

The following is the report based on individual provinces: Manitoba.—July favorable. Abundant moisture. Slight hail damage. Wheat cutting not general until late August. Much late grain. Pastures excellent. Heavy July crop but low natural moisture too wet to cut. Vicious straw grain. Promise of a late average grain yield if everything proceeds favorably and rust does not develop.

Saskatchewan.—Favorable weather over the province has resulted in strong growth of all grains. Wheat, although later than last year, is reported in healthy condition with a generally even stand. Late by the wet weather of the past week, about 70 per cent. is now in the hands of the grain. In good condition with safe coming in late. Slight traces of rust have appeared in the south and eastern parts of the province, being most noticeable along the line from Vervaco to Weyburn, and from the north to Vink. Hail caused damage to the crops in scattered spots throughout the north and northwest parts of the province. Severe frost in the south to the south, storm originating west of Salt Creek, which travelled in a south-easterly direction and caused serious injury in the Vanguard, Kincaid and LeFlore districts. Summer-fallings about 90 per cent. completed. Pastures are in good condition with a splendid supply of moisture.

Alberta.—Crop conditions on July 21 encouraging. Wheat and barley all in the hands of the farmer. All grain filling well. Rye harvest started. Pastures rank and bay crop being cut. Hail damage in western areas. Prospects for good increase in yield over 1925. Crop conditions in southern Alberta somewhat better, except for danger of frost before late fall crops ripen.

British Columbia.—All crops ripening well. Harvesting two well advanced. Wheat cutting commenced. Will be general in week's time. Good yields will be well above average. Potatoes and root crops promising. Early estimates of 50 per cent. apple crop still holds good with prospects of a slight increase when harvesting completed.

Non-Stop Flight Falls

British Aviator On Secret Trip To India Catches

London.—The British air ministry announced that an attempt of a Royal Air Force machine to make a non-stop flight to India ended when the pilot, Lt. John G. Gurney, died in the air. The plane fell at Sonbhet near Lucknow.

Despatches from Vienna reported that the plane fell at Sonbhet near Lucknow. The accident was caused by the over heating of the engine.

Flight Lieutenant C. B. Carr and Flying Officer G. D. Heath, neither of whom, it was stated, was badly hurt, were taken to Ashleh, near Lucknow.

Heid Night Session

Dublin.—The Dail Eireann decided by a vote of 54 to 24 to sit all night for the purpose of passing the government's drastic public safety bill. The bill was introduced by President William Cosgrave, after the recent assassination of Vice-President Kevin O'Higgins. Under the bill the penalty may be imposed for the possession of arms.

Report Is Passed

OTTAWA.—A report which has appeared in a portion of the press to the effect that Right Hon. Stanley Baldwin has accepted a gift of a motor car made especially for his use during his Canadian visit was emphatically denied by members of the British Premier's staff. There was said to be absolutely no foundation for the report.

Promotions Approved

Regina.—Among the promotions and transfers approved by the Civil Service Commission are the following: Arthur Patterson, Prince Albert, from grade 3 clerk to grade 4; George Garrett, Forest Assessor, grade 2; John C. Coulter, Walter Patten, to be radio inspector or radio electrician, Regina.

Patient Carried By Plane

Woman's Life Is Saved By Patrol Aeroplane in Northern Manitoba

Winnipeg.—A flight of 150 miles by a patrol plane was made to save the life of Mrs. Laughton of Norway House, Man. The woman was taken seriously ill and an operation was necessary. Medical aid was to be had no nearer than the Pua as the doctor of Norway House had come north to make a payment of Indian treaty money.

Flight-Lt. Mawley, after obtaining authority by radio from his commanding officer in Winnipeg, took off with his patient on his life and death mission. The plane carried the patient, a mechanic, and Nurse O'Leary of Norway House, besides the pilot. The machine landed safely at the Pua and Mrs. Laughton was rushed to the hospital, where Dr. O'Leary performed the operation. After the doctor the woman would have died if an operation had not been performed within 12 hours. Mrs. Laughton is recovering.

British Women Making Tour

Large Party Will Make Trip Through Western Canada

Toronto.—A party of 200 women from the County headed by Mrs. J. W. Drummond, of London, England, has arrived in Toronto. They are touring Canada and intend to journey through the western provinces and on to the coast.

Mrs. Drummond, who called fame as the leader of suffragettes, has gathered a number of women to a new movement called "the guild of 1200," which is designed to educate the women to the needs of the economic and industrial needs of the Empire. It has a membership of 40,000 at present.

May Return Via Canada

Edmonton.—Requests that British immigrants from China be routed via Canada by way of Canada are now being considered by the British war office. This information was given in a cablegram that Major Barry received from ex-Premier H. Greenwood, commissioner of immigration for Alberta at London.

Promoted To Admiral

London.—Vice-Admiral Sir Walter Henry Cowan has been promoted admiral. He is 65 years of age and has served in the Royal Navy since 1896.

DEDICATE ALTAR WHERE LIES BOOK OF REMEMBRANCE

Ottawa.—Within the sanctuary of the Peace Tower the Prince of Wales dedicated the altar where will lie the Book of Remembrance to the 60,000 Canadians who died in the war. There in the memorial chamber, standing on stone from the battlefields of France and Flanders, the Prince had placed about his name whose names are known in Canada through and through. The Government-General, Lord Bessborough, stood beside him with Prince George and the Prime Minister of Great Britain and Mr. Baldwin. The apostolic delegate stood close by the moderator of the Presbyterian Church and the President of the Baptist conference.

Premier King and a few were in the shrine of the Royal Highness to dedicate the altar. He spoke of what it meant, how the altar was a gift from the mother country of Great Britain, how, when the book of remembrance was finally deposited, it would contain the names of sixty thousand Canadian dead.

The Prince advanced.

In the name of the people of Canada, the Prince of Wales, in the name of this chamber to receive and hold over the Book of Remembrance to the glory of those whose names are written therein that they may live for all generations."

He raised the Union Jack and held it high, and, as he turned it revealing a book of cloth of red and white, he said, "a cloth of sunlight stream through the windows and words inscribed on the altar were clear and distinct:

"My names and scars I carry with me to the end of the world. I have fought for my battles which will now be my reward. So he passed over and all the trumpets sounded for him on either side."

As the last words fell from the lips of the Prince, the Last Post echoed through the silence of the tower. Above the flag, draped in tribute, faintly from the great square outside could be heard the guard of honour called to the present arms.

ARRANGING FOR HARVEST HELP FOR THE WEST

Montreal.—Arrangements for the handling of the 25,000 foreign laborers required by western Canada this year are being made at conferences of passenger department officials, representing both railways, held here, when men and fares for harvest excursion trains to Western Canada were announced.

The two railways will operate harvest excursions on simultaneous dates from each area.

The first of the series will leave points in the maritime provinces on Tuesday, August 25. Montreal and points in Quebec province will be served by excursions leaving on Tuesday, August 26. Toronto and points east, harvesters will be taken west in special trains over both railways on Tuesday, August 27. Southern Ontario points will be served by excursions leaving on Wednesday, September 7.

This year's requirements for harvesters was decided upon at conferences in Winnipeg, when representatives of the railways, the employment services and the Federal Department of Immigration were in attendance. Agricultural and employment services of the provinces of Ontario, Saskatchewan and Alberta were in attendance. For the three provinces, requirements were:

Ontario, 15,000; Saskatchewan, 10,000; Alberta, 15,000. Of these there are available locally in the three provinces persons of a standard who will be required are available in British Columbia, leaving a balance of 25,000 for Eastern Canada to supply.

Distribution arrangements similar to those in effect in other years have been made so that harvesters arriving in Winnipeg will be required in points where their services are required.

Scandinavian States Have Outlawed War

Series Of Treaties Ensure Peace For All Time

Stockholm.—By a series of international treaties, Sweden and her Scandinavian neighbors, as well as a number of other European countries, have agreed to outlaw war. In a treaty signed in London, it was declared in the treaty.

"Of course," said the Premier, "if one of the parties breaks the contract, war may break out, just the same, but it will not be legal."

"We have agreed with these countries to all disputes and to settle them, as to be arranged peacefully. The methods of procedure differ slightly in each case, but the effect is the same, and that is to settle by direct negotiations or by arbitration will be decided by the International Court of Justice at The Hague."

The states with which Sweden has solemnly pledged itself to rule war as a crime, include Denmark, Belgium, Poland, Austria and Czechoslovakia. The other Scandinavian states have also made similar terms with each other.

At present, negotiations are pending between Sweden and France for a similar agreement. The actual conference was to have started in June, but, owing to the parliamentary situation in France, it was postponed until next January.

War Veterans Secure Land

Returned Men File On Homesteads

Montreal.—Barrington, N.S., is the home of the one famous War Hero, south of the St. Lawrence, consists of an estate in the name of the property of the Shannock Rural Municipality. The remainder of the farm pasture was given to the homesteaders, and only one quarter-section of very poor land was sown by the homesteaders, who filed on some 300 acres. About one-half of the acreage was obtained by war veterans and every parcel was secured by men of British blood who are actively engaged in raising questions within 100 miles of the land they desired.

Water Was Electrified

Brunswick, N.S.—A factory here, started to wash his hands in a basin of water in the floor. He woke up in a hospital. The basin was electrically charged with an electric refrigerator plant.

Western Canada To Be Important Section Of One Of World's Greatest Countries

Western Canada, "An Area of Importance," is destined to be in the years to come one of the greatest nations of the world, according to Roger W. Henson, prominent statistician and an authority on business affairs, who addressed the Board of Trade at Calgary recently.

Mr. Henson dealt with the location, the climate and the resources of the country and to the characteristics of the people who comprise its population. He spoke of the emigration of the Canadian youth to the United States, and deprecated the fact that the majority of Canada is not taught in the universities in order that students might be shown that to go to the United States is but to live on a hill and have for a few years to be thrown on the scrap-heap later, when, after they stayed in Canada, they might start from the bottom of the ladder, but must build business and financial independence for themselves.

He dealt in detail with this exodus, which has been taking place from Canada to the United States, the speaker declared that, during his travels in Canada he has made a point of inquiring from the young people whom he has met, to find out what their primary ambitions are. He has found here many who come from the British Isles and Australia who are staying in Canada only until they can get to the United States may be thrown open.

"In your universities and colleges, you are teaching your young people about history and the sciences, but you are not teaching them enough about Canada," he asked. "Are you teaching them anything about Canada's resources? Are you telling them the truth about the economics of Canada?"

Much can be done to really assist these young people by educating them to the true economic condition of the United States. At present that country, he continued, is bearing forward in a great wave of prosperity, but the wave is not always fast; the stock markets are made always continue to go up. There must be the other way and when the depression comes the Canadian who is not a fish, the Scotch and the Australians will be the first to be cast out of employment. Much can be done to prevent this disaster for the future by proper method of education, he continued.

Canada, he declared, has the proper climate because a temperate climate is necessary for the building of a true civilization. A temperate climate has always been responsible for the raising of the races of men, who have contributed the most to the world's progress, and a temperate climate gave example in the development of the United States to show that the large majority of the men who really contributed most to the building of the nation's greatness came from the northern climes.

Shipping Horses To Russia

Western Horses Bound For Russia

The first of the 1,000 Canadian horses ordered by the Russian Soviet government has left Alberta. It is announced by J. M. McCallum of the Canadian Department of Agriculture. Arrangements were made for a train load of 28 cars, carrying 500 horses, to leave Calgary and Medicine Hat.

Although some difficulty has been caused in procuring the number of horses required because of the price offered, Mr. McCallum said the first boat load will leave Quebec only a few hours short of the 1,400 previously arranged for.

Advice Seemed Good

Certain actor, playing the part of a consumptive hero, granted a realistic cough. During the first performance he coughed continually. After one terrific explosion he did not, in the play, had to remark, "My dear friend, what can I do for you?" Whereupon a sympathetic friend from the gallery exclaimed, "If you are my friend, why don't you give him a blooming cough?"

Good Prospects For Sheep

Prospects for the sheep industry are most hopeful this year with good prices in sight for both lambs and wool, according to W. H. J. Tisdale, assistant manager of the Canadian Wool Growers' Association, who has just completed a tour of the wool growing districts of Western Canada.

W. N. U. 1693

England Enjoys Empire Fruits

Depends On Export From Dominions For Luxury In Winter

In our use of fruit today, says the Secretary of the Dominions has just put it, we are still heavily dependent on the United States, as the Continent is far behind us. The Americans had the start of us by the luck of their position. The United States possesses not one climate, but many, produces within its own frontiers an abundance of all the fruits of the temperate and sub-tropical zones, and the Tropics are at its doors. Our small islands, though we may boast that the fruits which we do grow no one on earth grows better, cannot provide for twelve months in the year. It is only since the Dominions began to develop their natural resources and send us the crops of the orchards under the Southern Cross that "we have had peaches and plums in winter and apples all the year round."—London Daily Telegraph.

Injustice To Agriculture

Food Shortage Is Predicted In United States Within Next Ten Years

A report by the Industrial picture against high food costs was pictured before the Institute of Politics in New York in the United States within the next 40 years.

Henry A. Wallace, one of the former secretaries of the association, in an address on the agricultural situation, declared the grave injustice that has been done to agriculture during the past six years. He pointed out the shortage within 40 years with resultant disturbances that will cause industrial centers a thousand times as much worry as the present farm situation.

He also warned that the industrial nations, not even the United States, when an immensely inadequate food supply compels them to pay undue proportion of their wages for food.

Offer High Price For Poultry

University Of British Columbia Offers \$10,000 For Eggs

An offer of \$10,000 for the famous hen No. 6 or \$3,000 for a pen of ten hens of last year's Experimental Farm content at Agassiz, of which hen No. 6 was one, has been made to Professor Lloyd, of the University of British Columbia, who is in charge of the British Columbia exhibit at the World's Poultry Congress, where the eggs are being exhibited.

Dean Clement, head of the College of Agriculture in the U.C. University, to whom the offer was referred, announced recently that it had been declined as the birds were of too great value to the University for breeding purposes to dispose of them. The offer is said to be the highest ever made for utility stock.

British Children Travelling

More applications are now being received at the British passport office for names of children to be included in parents' passports than ever have been dealt with before. Travelling agents abroad for brief periods are taking younger members of their families with them and the demand for children's passports has become so heavy that extra provision has had to be made on many ships for young passengers.

Found More Money In Hay

A ten day hay bought for \$25 on the track at Hudson, Ont., costs \$175 at Red Lake. A far-sighted prospector staked about ten acres of comparatively clear land at Snake Falls. The following summer he cut and stacked twelve tons of wild hay which he sold to a transportation company for \$125 per ton in the stack; he has since ditched his place and stored in favor of a seythe and rake.

Poultry Business Profitable

Canada Not Yet Aware Of Importance Of Industry

An honor was paid to Canada by selecting Ottawa as the scene of the World's Poultry Congress. This is only the third congress that has been held, so that the place of the Dominion in poultry matters has early received international recognition.

Canadians are so much accustomed to hear about the value of the wheat production in the West, the value of our lumber and minerals, and the value of our manufactures, that the importance of the poultry industry is little sign of it.

There are two great poultry farms, but it is the few here and the few there that combine to make up a vast unit, to those who know how to handle it right, a very profitable business. Fifty million dollars is the value of the annual production of eggs alone in this country. Many millions more must be counted for poultry sold for the table.

Canadian eggs stand foremost in quality. They command the highest price for eggs imported by the British market.

That position is only achieved by sound breeding. The result carries its own message for the farmers of this country. If quality of eggs commands the highest price in the export trade, the same principle applies to bacon, butter, cheese and every other product. In these times Canada is either falling behind or almost standing still. They need stirring up to a realization of their opportunities.

They owe it to themselves and to Canada, not to every article that is sought by export buyers will measure up to one standard—the best—and importers will have confidence that it is Canadian it is good.

Use Tar Sands On The Road

Ninety Carloads Of Tar Sands From Fort McMurray To Be Used At Jasper

Ninety carloads of tar sands will be shipped from McMurray during the present summer, to be used in road-making at Jasper Park. The use of surfacing the roads is being supervised by Dr. S. G. Ellis of Ottawa, who has spent several years investigating the tar sand deposits and experimenting with the material with a view of developing some practical means of utilizing the material. A place of road paved with the tar sands in the City of Edmonton some years ago under the supervision of Dr. Ellis, is in almost as good condition today as it was when first laid down, in spite of heavy traffic.

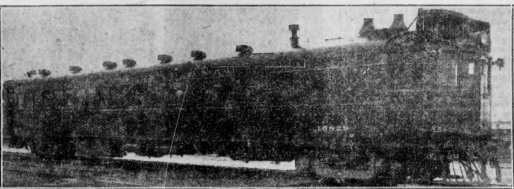

Weight Of Rainfall

One Inch Of Rainfall Deposits 113 Tons Of Water On Each Acre

One does not usually associate rain with great weight. Even when the clouds let loose a torrential downpour the mind recoils if it comes rather than one, yet one inch of rainfall deposits 113 tons of water on each acre of ground surface. To take an extreme case, so far as known rainfall goes, that of Cherrapunji, in India, on the watershed of the Ganges, nearly 30,000 tons have fallen in but one month, August. The average annual rainfall of 426 inches there comes to nearly 5,000 tons to the acre.

A Salesman: "And what kind of a born would you like, sir? Do you care for a good, loud roar?" Hungry Customer: "No; I want something that just sneezes."

RUNNING AHEAD OF THE TIMES

To keep abreast of the times is good, but to run ahead of them is better, and that is what the Canadian National Railway is doing in putting on the rails this powerful electric car, the latest invention in railroad transportation equipment. Two of these cars have just been ordered from Montreal for service on the line between Saskatoon and Edmonton.

They are fashioned after the electric car which made the famous run from Montreal to Vancouver in seventy-six hours in the fall of 1925, but they contain many improvements and additions and are equipped with six-cylinder engines. Although many times the cost of the old-fashioned passenger coaches, they are well endeavored to evolve a car which would be economical to operate as

Migratory Birds Treaty Between Canada and U. S. Has Been Very Beneficial

Horses Deserves Best Of Care

Is Still Indispensable and Renders Good Service

The horse is a faithful, patient friend of man. He deserves the best of care and attention. He still plays an important part in the economic life of the nation, and is still indispensable. In short, he is a cheaper power than the auto. Apart from treating the horse well for his usefulness, it pays to use him well from the standpoint of service. A well-fed, well-cared-for horse will be in a position to render better service than the horse which is neglected and ill-fed.

Now that the hot weather is here, working horses may suffer from any one of a number of ailments, the other the bit. Almost every working horse bears scars of a painful sore on the leg of his neck, where the collar has been torn. Often he is compelled to wear a breast collar, and this places him at a disadvantage when handling a heavy load. A properly fitted collar, well adjusted and padded, will cause no trouble.

He goes to your horse. It will be grateful to you and will render you increased service.

Retain Women Employees

No General Removal Of Policy On The Part Of C.N.R.

"The Canadian National is not as a general principle, substituting men for women in the various clerical positions throughout its system," stated W. A. Kingston, general manager of western region, Canadian National Railways.

Press reports that women were to be let out of clerical positions all over the system and men substituted, caused some confusion in the railway. The situation is now clarified by Mr. Kingston.

What is being done, Mr. Kingston stated, was that in certain clerical positions where the conditions were considered that men were better fitted for the work than women, men were being substituted, but in no general reversal to the policy which existed before the war, when men were employed through the service, and few, if any, women.

Trying Color Cures

By replacing white walls and red coverlets in hospitals with delicate brown, yellow, and mauve ones, it is claimed that patients are kept in a better temper, sleep well, and leave the hospital three days sooner than under the old conditions. One hotel has been installed with chrome-colored walls, and is being used in the restful atmosphere of a room decorated in mauve.

Seek Cooler Motor Car

Experiments at the motor research laboratory of the American Society of Heating and Ventilating Engineers in the Pittsburgh bureau of mines may lead to many developments in automobile design, according to F. C. Houghton, director. Among the possibilities are mentioned white roofs and strips of dark burlap or other device to lower temperature in hot weather.

"If Spring shooting of migratory game birds had not been abolished throughout North America in 1916 there would not now be left a sufficient number of birds of certain important species to provide shooting for anybody, either in spring or fall."

This considered opinion of a Canadian game conservationist brings in to high relief the benefits of the Migratory Birds Treaty between Canada and the United States and the Act which implements it. The complete extinction of the passenger pigeon shows that this is not an overstatement, for while the case of the passenger pigeon presents peculiar features, nevertheless the fact remains that this bird and several other birds were exterminated because of lack of protection at the spring nesting time. The passenger pigeon in the 180's of the 19th century nested in Canada and the northern United States by millions, yet so rapid was the process of extermination that the bird had completely disappeared nearly thirty years ago.

This and other facts concerning the possible practical extermination of some of our remaining species of migratory game birds—geese, ducks, and cranes—has led to the establishment by sportmen of the necessity of spring shooting as a necessary provision. Under the old piecemeal methods of local regulation on the one hand, and the decreased area of breeding grounds and increased efficiency of the sportsmen on the other, many species of migratory game birds were, before 1916, dwindling in numbers. In a most rapid and alarming manner. Crossing as they did provincial, state, and national boundaries in their seasonal flights, the birds could not be protected by any one set of regulations. The Treaty, that was secured by the Treaty and the good sportsmen the different provinces and states are playing the many species of migratory game birds were, before 1916, dwindling in numbers. In a most rapid and alarming manner.

Everyone knows that there is no surer way to exterminate any animal or bird than to pursue and harry it incessantly before and during the breeding season. *Fighting into consideration that every bird arriving in a country has been protected by the Treaty, it is probably not over the mark to say, from the standpoint of bird conservation, that each bird killed in spring is the equivalent of four or five killed in the autumn.*

The abolition of spring shooting, according to reports from all parts of the country, has increased the fall flights, and birds are now nesting in localities where they had not been seen for so long that the sportsmen believe they had never nested there. The object, of course, in these cases is to increase the human profit and pleasure but to increase by perpetuating and increasing the numbers of the animals or birds concerned. The fact that the birds are now nesting in Canada has a good stock of moose and deer, and is rapidly bringing back the buffalo and bison and there is every reason to believe that the same happy result will follow the efficient management of North America's wild ducks and geese.

Another Royal Ranch

Land On Vancouver Island May Be Presented To Prince George

Prince George may be the recipient of a ranch at Cobble Hill, Vancouver Island, B.C., when he and the Prince of Wales visit here this summer. The proposed presentation has been sponsored by the Associated Home Builders' Trade of Vancouver Island, and the Government will be asked to vote \$25,000 for the purpose, the city of Victoria \$10,000 and other municipalities on the island \$10,000. The remaining \$10,000 of the \$55,000 would be raised by public subscription.

Although the ranch, including machinery and equipment, may be purchased for \$35,000, it is stated that \$265,000 has been expended on it. The project will help the Government almost immediately.

Hunting For New Double Stars

Through a huge telescope that has been completed after many months of work, the Canadian National Railways have been the only system to the present, successful in producing a self-propelled unit capable of fulfilling all the requirements. The new cars are 75 feet 9 inches in length and ten feet wide and have four doors, baggage, passenger and smoking compartments. They carry 300 gallons of fuel.

well as able to satisfy the demands of traffic. The Canadian National Railways have been the only system to the present, successful in producing a self-propelled unit capable of fulfilling all the requirements. The new cars are 75 feet 9 inches in length and ten feet wide and have four doors, baggage, passenger and smoking compartments. They carry 300 gallons of fuel.

FORMER PUBLISHER
RELEASED
Horatio Nuttmann, former member of the British Parliament, and founder of the weekly paper, "John Bull," who has been released from Maidstone Prison after serving five years of a seven years' sentence for theft of funds of the Victory Bond Club. He is expected to re-enter the publishing business.

About Town and Country

Mrs. M. G. Whitlock and family, who have been spending a holiday at the coast, returned to Oyen last Thursday.

Mr. and Mrs. H. R. McMurray and family, who have been residing in the States during the last two years, arrived in Oyen last Saturday, from Lander, Wyoming.

Mr. J. J. Purcell was a business visitor in Calgary over the week-end, returning to Oyen yesterday.

Miss Gladys Walker left last Thursday for Vancouver, en route to Skagway, Alaska, where she will spend a vacation.

Born-To Mr. and Mrs. J. D. Hetherington (nee Ruth Walker) at Alexander Hospital, Edmonton, on July 31, a son.

The Oyen District Builders Association will not meet again till November.

Mrs. J. C. Desso left last Friday with Mr. and Mrs. Bigham, by auto for Monitor, en route to Edmonton, and the States.

Miss Catherine Wright, who has been visiting at the home of Mr. and Mrs. T. W. Johnston at Rossmore, Sask., returned to Oyen yesterday.

Miss Peggy Patterson and Miss Nancy Ferguson left last Thursday for their homes in Medicine Hat, having resigned from the staff of the Oyen hospital.

Miss Beth Pfeiffer is the guest of Miss Thelma Dial.

The rainfall of last Friday morning amounted to 22 inch.

Only a few isolated reports of frost have been received covering this district. In each case doubt has been expressed that the temperature was at any hour last Monday morning low enough to do any damage to the crops.

Frederick C. E. Hford, Dominion Country Husbandman at Ottawa, has been elected President of the World's Country Congress, to be held in London, England, in 1928.

WEDDING

WILSON—CASHORE

On Thursday evening, August 4, a pretty wedding took place at the home of Mr. and Mrs. John Cashore, near Al-sask, Sask., when their daughter Laura Jeanette, became the bride of Mr. Robert E. Wilson. The ceremony was performed by Rev. Gordon, of the United Church, Al-sask, before immediate relatives and about twenty five guests.

The bride was charming in a gown of orchid georgette and carried a bouquet of sweet-heart roses.

Following the ceremony, the bride and couple and guests enjoyed a dainty buffet supper.

Later Mr. and Mrs. Wilson left by train for Calgary and Jasper Park where they will honeymoon prior to taking up residence in Nalcan, Sask.
